

Comprehensive Fire Fabrication Services

- » Cutting
- » Plasma Cutting
- » Welding
- » Re-grooving
- » Threading
- » Hanger assembly
- » Outlet welding
- » Materials:
 - Carbon steel
 - Galvanized

Fabrication Services for Critical Fire-Safety Systems

At Progressive Pipe Fabricators, we offer custom solutions for virtually every type of sprinkler system, including fabrication for pipefittings, valves, heads, and a range of other components.

Fire sprinklers are highly sophisticated systems that often require unique, tailored solutions that only professional fabrication can provide. At Progressive Pipe Fabricators, we have both the specialized knowledge and cutting-edge facilities needed to solve even the most complex fabrication challenges

Nearly 350,000 Square Feet Dedicated to High Quality Fabrication

Across three locations, we operate state-of-the-art, fabrication facilities and employ a team of over 200 staff members. We have a high operating capacity, shipping approximately 42 million pounds of fabricated material per week.

Our shops provide us the advantage of working in a tightly controlled environment which not only promotes higher quality and more efficient processes but can also help increase worksite safety.

Powerful, Advanced Fabrication Equipment

We support our teams with some of the finest equipment in the industry, including:

- » Automatic production welders
- » Plasma cutting stations
- » Thread line machines
- » Manual weld stations
- » Computer-aided design and building information modeling software

Broad Fabrication Capabilities

The capacity and specifications of our shop and equipment include:

- » Welding, grooving, and threading for galvanized pipe
- » Headers, weld flanges, and adjustable pipe stands
- » Hanger fabrication
- » Threading:
 - 0.5 inches to 8 inches
 - Carbon steel and galvanized
- » Grooving:
 - Roll up to 36 feet
 - Cut from 2.5 to 12 feet
- » Unistrut and angle iron, cut to length and slotted
- » Painting and powder coating finishes
